

To the FCC,

As a resident of Sellersburg Indiana there are very few positive and progressive radio stations in our area. Airl reaches a very specific but very important group of young people who are looking for a positive message that is geared towards the needs and problems of their generation. If Airl were to be displaced by an LPFM transmitter, a community of young energetic progressive people would be cut off from a great source of joy and encouragement through the daily translator broadcast of Airl. Airl is using technology in a way that is ahead of its time. By using translator stations all around the U.S. Airl's broadcast can be heard by hundreds of thousands of people who would otherwise, not have that opportunity. The message of Airl is positive, fresh, and so helpful and encouraging to the people of Sellersburg, New Albany, New Washington and the surrounding Southern Indiana area; that it would be a great loss for a LPFM broadcaster to displace it. Thank you so much for considering my comments on this issue.

Sincerely,

Nathan S. Collins
